Further information

Paternity recognition

Neither official paternity recognition procedure nor official document exists in Tanzania to legally establish the paternity of children born out of wedlock.

According to Tanzanian law, no person shall be entered in the register as the father of a child born out of wedlock except at his own request and upon his acknowledging himself to be the father of the child and signing, or affixing his mark to, the register and birth certificate as such.

The competent civil status registry in Switzerland might choose to do a paternity recognition procedure in Switzerland in order to register the child.
